

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

Erläuterungen zur Bewertung des Fair Finance Guides sowie der Umsetzung der Kriterien in unserer Bewertungssystematik

Climate Change				
Grundsätzliche Aussagen zum Themenfeld Climate Change => Im Sommer 2020 unterschrieb die KD-Bank gemeinsam mit 15 weiteren Finanzinstituten eine Selbstverpflichtung, unsere Kredit- bzw. Investmentportfolien im Einklang mit den Zielen des Pariser Klimaabkommens auszurichten und durch die Finanzierung der Transformation hin zu einer emissionsarmen und klimaresilienten Wirtschaft und Gesellschaft, die Erderwärmung auf deutlich unter 2 Grad zu begrenzen und das 1,5 Grad Ziel anzustreben. Pressemittteilung >> https://www.kd-bank.de/wir_fuer_sie/presse/dnk-selbstverpflichtung-klima.html				
Fair Finance Guide: The following elements are crucial for a policy regarding the companies a financial institution invests in:		Bestandteil Ratingsprozess	Genaue Definition des Kriteriums in der ISS ESG Ratingsystematik:	Parteien hinaus Ausschluss im Kundenkreditgeschäft (Corporate credit und Project finance)
8	The financial institution does not finance, or invest in, companies which are active in coal-fired power generation and/or coal mining for more than 30% of their activities.	Yes	- exclusion criterion: total fossil-fuel-related activities (> 30 % of net sales), total coal-related activities (> 20 % of net sales), coal producer (> 5 % of net sales)	exclusion criterion: Corporate credits and Project finance (100 %)
9	The financial institution does not finance, or invest in, companies which are active in fossil fuel-fired power generation and/or extraction of oil and gas for more than 30% of their activities.	Yes	- exclusion criterion: total fossil-fuel-related activities (> 30 % of net sales), total coal-related activities (> 20 % of net sales), coal producer (> 5 % of net sales)	exclusion criterion: Corporate credits and Project finance (100 %)
10	The financial institution does not finance, or invest in, companies which are active in coal-fired power generation and/or coal mining for more than 0% of their activities.	Yes	- exclusion criterion: total fossil-fuel-related activities (> 30 % of net sales), total coal-related activities (> 20 % of net sales), coal producer (> 5 % of net sales)	exclusion criterion: Corporate credits and Project finance (100 %)
11	The financial institution does not finance, or invest in, companies which are active in fossil fuel-fired power generation and/or extraction of oil and gas for more than 0% of their activities.	Yes	- exclusion criterion: total fossil-fuel-related activities (> 30 % of net sales), total coal-related activities (> 20 % of net sales), coal producer (> 5 % of net sales)	exclusion criterion: Corporate credits and Project finance (100 %)
12	Companies disclose their direct and indirect greenhouse gas emissions.	Yes	- Greenhouse gas emission inventories	
13	Companies reduce their direct and indirect greenhouse gas emissions.	Yes	- Greenhouse gas emission reduction targets and action plans - Greenhouse gas emission intensity - Carbon intensity (business travel)	
14	Companies switch from using fossil fuels to renewable energy sources.	Yes	- Energy use by source - Alternative drives and fuels	
15	Unabated coal-fired power generation (i.e. without operational carbon capture and storage) is unacceptable.	Yes	- exclusion criterion: total coal-related activities (> 20 % of net sales)	exclusion criterion: Corporate credits and Project finance (100 %)
16	Coal-fired power generation is unacceptable.	Yes	- exclusion criterion: coal producer (> 5 % of net sales)	exclusion criterion: Corporate credits and Project finance (100 %)
17	Fossil fuel-fired power generation in unacceptable	Yes	- exclusion criterion: total fossil-fuel-related activities (> 30 % of net sales)	exclusion criterion: Corporate credits and Project finance (100 %)
18	Thermal coal mining is unacceptable.	Yes	- exclusion criterion: coal producer (> 5 % of net sales)	exclusion criterion: Corporate credits and Project finance (100 %)
19	Extracting oil from tar sands is unacceptable	Yes	- exclusion criterion: tar sand	exclusion criterion: Corporate credits and Project finance (100 %)
20	Extracting oil and gas in unacceptable	Yes	- exclusion criterion: total fossil-fuel-related activities (> 30 % of net sales)	exclusion criterion: Corporate credits and Project finance (100 %)
21	Conversion of peatland and high-carbon stocks for agricultural development is unacceptable.	Yes	- exclusion criterion: Controversial Environmental Practices (e.g. Conversion of peatland/new palm oil plantations on primary tropical/rain forest land) - Position on climate change	exclusion criterion: Corporate credits and Project finance (100 %)
22	Companies integrate criteria on climate change in their procurement and operational policies.	Yes	- Environmental management in the supply chain	
22	The production of biomaterials complies with the 12 principles of the Roundtable on Sustainable Biomaterials (RSB).	Yes	We meet the requirement because we review the RSB principles as part of the rating process and take them into account in our investments. Any violations are uncovered as part of the controversy screening process. They lead to the exclusion of the company if our engagement activities have no effect.	
23	CO2-compensation is certified according to the criteria of relevant certification schemes for CO2 compensation (mentioned in section 2.2.2).	Partly	- Business travel: Carbon offset programme (no certification required)	
24	Companies do not participate in direct or indirect lobbying (attempting to influence decisions made by regulators) aimed at weakening climate policy.	Yes	- Transparency on participation in public policy making and lobbying activities	

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

26	Companies include clauses on the compliance with criteria on climate change in their contracts with subcontractors and suppliers.	Yes	Clauses on compliance with climate change criteria are queried in the rating under 'Supplier Code of Conduct'. Depending on the industry, the question in the rating is aimed at further sub-items, e.g. environmental management system, Resource efficiency, site rehabilitation, pollution prevention	Content of environmental supplier standard: i. Environmental management system ii. Resource efficiency: energy, water and material consumption
Human Rights				
Grundsätzliche Aussagen zum Themenfeld Human Rights => Der Verhaltenskodex der Bank für Kirche und Diakonie sowie die im Nachhaltigkeitsfilter genannten Ausschlüsse umfassen ausdrücklich auch die United Nations Guiding Principles on Business and Human Rights (UNGPs) und die Free Prior Informed Consent (FPIC) Prinzipien, die die Rechte der indigenen Bevölkerung sichern und schützen sollen. Fair Finance Guide: The following elements are crucial for a policy regarding the companies a financial institution invests in:				
		Bestandteil Ratingsprozess	Genaue Definition des Kriteriums in der ISS ESG Ratingsystematik:	Darüber hinaus Ausschluss im Kundenkreditgeschäft (Corporate credits und Project finance)
3	Companies respect all human rights as described in the United Nations Guiding Principles on Business and Human Rights.	Yes	– Policy on human rights – Human rights due diligence procedures – Major controversies relating to human rights	
4	Companies have a policy commitment to meet their responsibility to respect human rights.	Yes	– Policy on human rights	
5	Companies have a <i>human rights due diligence process</i> to identify, prevent, mitigate and account for how they address their impact on human rights.	Yes	– Human rights due diligence procedures	
6	Companies have processes to enable the <i>remediation</i> of any adverse human rights impact to which they cause or to which they contribute.	Yes	– Human rights due diligence procedures (Grievance and remedies)	
7	Companies establish or participate in effective operational-level grievance mechanisms for individuals and communities who may be adversely impacted.	Yes	– Policy on human rights	
	Companies prevent conflicts over land rights and acquire natural resources only by engaging in meaningful consultation with local communities and obtaining free, prior and informed consent (FPIC) when it concerns indigenous peoples.	Yes	– Policy on human rights (e.g. resettlement and compensation; indigenous peoples and traditional livelihoods) – Community outreach and consultation – Policy on human rights: Resettlement and compensation. The KD-Bank's Code of Conduct and the exclusions listed in the Sustainability Filter explicitly include the United Nations Guiding Principles on Business and Human Rights (UNGPs) and the Free Prior Informed Consent (FPIC) Principles, which are designed to secure and protect the rights of indigenous peoples and all people with traditional tenure rights.	exclusion criterion: Corporate credits and Project finance (100 %)
9	Companies prevent conflicts over land rights and acquire natural resources only with free, prior and informed consent (FPIC) of the land users involved.	Yes	– Policy on human rights (e.g. resettlement and compensation; indigenous peoples and traditional livelihoods) – Community outreach and consultation – Policy on human rights: Resettlement and compensation.	exclusion criterion: Corporate credits and Project finance (100 %)
	Companies have special attention for respecting the rights of women, especially to prevent discrimination and to improve equal treatment of men and women.	Yes	– Policy on non-discrimination – Measures to promote equal opportunities and diversity – Gender distribution	
11	Companies have special attention to respect the rights of children.	Yes	– Supplier standards with regard to labour rights and working conditions – Procedures to ensure compliance with supplier standards on labour rights and working conditions – Measures to enable key suppliers to safeguard labour rights and improve working conditions – Policy on responsible marketing (child protection) – Policy/measures to prevent (child) sex tourism	

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

12	Companies have special attention for respecting the rights of persons with disabilities.	Yes	It is important to us that companies respect and honor the rights of people with disabilities. We fulfill this requirement by taking this point into account in the company evaluation. It is part of our engagement activities. In addition, a violation within the scope of the controversy screening leads to the exclusion of the company. - Policy on non-discrimination - Measures to promote equal opportunities and diversity - Gender distribution	
13	Companies do not enable settlements, including their economic activities, in occupied territories in respect of International Humanitarian Law.	Yes	- Exclusion criterion: Human Rights Controversies - Major controversies relating to human rights Activities in occupied/disputed territories are assessed within the exclusion criterion Human Rights. International humanitarian law establishes obligations on occupying powers concerning, inter alia, humane treatment and physical integrity of the people in the disputed territory, respect for existing laws, respect for and protection of real and personal property, and the management of public property, including natural resources. The Fourth Geneva Convention also prohibits the occupying power from transferring parts of its own civilian population into the territory that it occupies. Regarding all these issues, companies operating in occupied/disputed territories may become complicit in human rights violations of the people in the occupied region. The severity of the assessment depends on the question how direct the company's activities contribute to the violation of the human rights of the affected people.: A severe controversy / exclusion is assigned in cases where the company, with its products/services, directly contributes to the human rights violation of people in disputed territories, A moderate controversy is assigned in cases where the company, with its products/services, substantially contributes to make illegal settlements more attractive. No downgrading is assigned in case of mere business activity of a company, e.g. of a foodstuff company, in an occupied/disputed territory, provided that the business activity does not substantially contribute to maintenance of a state/settlement.	

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

14	Companies integrate human rights criteria into their procurement and operational policies.	Yes	The supplier standard has to be signed by suppliers. The wording of the standard (or the vast majority of its requirements) is binding. Bindingness consists of two requirements, only in case both are met for all (or the vast majority) of standards a grade is awarded: - suppliers have to sign the standard / contractually abide by the standard (e.g. by incorporating standard into contracts) - wording of the standard must be binding (e.g. "suppliers shall/are required" / "we expect suppliers to..." instead of "suppliers should/are encouraged") The following indicators are checked: - prohibition of forced labour - prohibition of child labour - Reference to ILO - Freedom of Association - Health and Safety - Wages - Working Time - Regular employment - migrant workers - harassment and abusive behaviour - discrimination - Inclusion of extended supply chain	
Labour Rights				
Grundsätzliche Aussagen zum Themenfeld Labour Rights => Die Bank für Kirche und Diakonie hält die ILO-Kernarbeitsnormen (Vereinigungsfreiheit und Recht auf Kollektivverhandlungen, Beseitigung der Zwangsarbeit, Abschaffung der Kinderarbeit, Verbot der Diskriminierung in Beschäftigung und Beruf) ein und hat entsprechende Prozesse implementiert. Das Compliance Regelwerk der KD-Bank beinhaltet Regelungen zum Verhalten der Bank zur Verhinderung der Geldwäsche, der Terrorismusfinanzierung sowie sonstiger strafbarer Handlungen. Im Falle einer strafbaren Handlung eines Zulieferers im Rahmen der Geschäftsbeziehung zur KD-Bank gelten diese Regelungen uneingeschränkt. Zu den strafbaren Handlungen zählen wir selbstverständlich auch strafbare Verstöße gegen die ILO-Kernarbeitsnormen.				
Fair Finance Guide: The following elements are crucial for a policy regarding the companies a financial institution invests in:		Bestandteil Ratingprozess	Genaue Definition des Kriteriums in der ISS ESG Ratingsystematik:	Darüber hinaus Ausschluss im Kundenkreditgeschäft (Corporate credits und Project finance)
4	Companies uphold the freedom of association and the effective recognition of the right to collective bargaining.	Yes	- Policy on freedom of association and collective bargaining - Measures to ensure freedom of association and facilitate collective bargaining - Major controversies relating to freedom of association	
5	All forms of forced and compulsory labour are unacceptable.	Yes	Exclusion criterion: violation of labour rights (forced labour)	
6	Child labour is unacceptable.	Yes	Exclusion criterion: violation of labour rights (child labour)	
7	Discrimination in respect of employment and occupation is unacceptable.	Yes	Exclusion criterion: violation of labour rights (discrimination)	
8	Companies are committed to fair recruitment practices.	Yes	We have specified this requirement in the ESG Corporate Rating section under "Non-discrimination policy". The indicator assesses the existence and quality of the company's policies on equal opportunity, discrimination and harassment. The policy must cover all aspects of employment, including, for example, respect for human rights, compliance with local laws, prohibition of placement fees in hiring procedures, passports must not be withheld, and the data and privacy of hired workers must be protected.	

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

9	Companies pay a living wage to their employees.	Yes	We record the requirement for companies to pay their employees a living wage in the Quality Score and check the actual payment in the ESG Corporate Rating. The core criteria of the Global Living Wage Coalition are taken into account, e.g. sufficient for a family, earned within a standard working week, sufficient to cover basic needs, including food, water, housing, health care, transportation, clothing, and other essentials; and providing some discretionary income. - Reference to ILO	Corporate credits an Project finance: exclusion of any company which do not pay living wages to there employees
10	Companies apply a maximum of working hours.	Yes	With regard to working hours, which are regulated differently in many countries, we welcome the public commitment of companies to limit working hours. Companies that systematically impose excessive working hours without adequate rest periods are excluded. High social rules that go beyond legislation are also part of our active engagement policy and regularly part of our company talks. - Work-life balance	
11	Companies have a comprehensive health and safety policy.	Yes	- Health and safety management system - Policy on non-discrimination	
12	Companies ensure equal treatment and working conditions for migrant workers.	Yes	- Measures to promote equal opportunities and diversity Supplier standard with regard to labour rights and working conditions: Migrant workers	exclusion criterion: Corporate credits and Project finance (100 %)
13	Companies have a clear management system to monitor and, if needed, correct compliance with norms on labour law.	Yes	- Measures to ensure freedom of association and facilitate collective bargaining (assessing the existence of structural management aspects such as communication of rights, grievance procedures etc.) - Measures to promote equal opportunities and diversity (assessing the existence of structural management aspects such as targets, action plans etc.) - Implementation of a health and safety management system - Measures to ensure responsible workforce restructuring - Procedures to ensure compliance with supplier standards on labour rights and working conditions - Measures to enable key suppliers to safeguard labour rights and improve working conditions <i>Anmerkung Rankabrand: Whether having a clear management system to monitor and, if needed, correct compliance with norms on labour law isn't specified as a generally necessary criteria by KD Bank in its 'Nachhaltigkeitsfilter' (see link, page 2-3).</i>	
14	Companies establish procedures on how to deal and process employee complaints and to solve violations and conflicts, preferably in consultation with the relevant trade union.	Yes	We place the requirement within the ESG Corporate Rating under the heading "grievance procedures". The grievance procedures are not limited to freedom of association and collective bargaining. This item covers all types of employee grievances and labor rights violations. - Business ethics: Compliance procedures - Facilitation of non-compliance reporting / Whistleblower protection - Freedom of association and the right to collective bargaining. Measures to ensure freedom of association and facilitate collective bargaining - Grievance procedures	Die KD-Bank verfügt über einen Betriebsrat, der die Interessen der Mitarbeitenden vertritt (siehe Bericht DNK 2016). Die Einbindung von Gewerkschaften im Konfliktfall obliegt dem Betriebsrat und wird von der KD-Bank in keiner Weise eingeschränkt.
15	Companies integrate labour rights in their procurement policies.	Yes	- Supplier standards with regard to labour rights and working conditions - Procedures to ensure compliance with supplier standards on labour rights and working conditions - Measures to enable key suppliers to safeguard labour rights and improve working conditions	

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

16	Companies include clauses on the compliance with criteria on labour rights in their contracts with subcontractors and suppliers.	Yes	– Supplier standards with regard to labour rights and working conditions	
Nature				
Grundsätzliche Aussagen zum Themenfeld Nature => Die Bank für Kirche und Diakonie schließt Finanzierungen (Kredite und Projektfinanzierungen), bei denen der Zugang zu Wasser, die Biodiversität und bedrohte Tierarten, die auf der roten Liste IUCN stehen, generell aus. Darüber hinaus Ausschluss im Kundenkreditgeschäft (Corporate credits und Project finance)				
	Fair Finance Guide: The following elements are crucial for a policy regarding the companies a financial institution invests in:	Bestandteil Ratingsprozess	Gesamte Definition des Kriteriums in der ISS ESG Ratingsystematik:	
1	Companies prevent negative impacts on High Conservation Value (HCV) areas within their business operations and the areas they manage.	Yes	– exclusion criterion: Controversial Environmental Practices (e.g. projects or practices deliberately, severely and unversibly impacting on ecosystems with very high biodiversity and conservation value - e.g. mining in (protected) primary rainforests or below glaciers)	
2	Companies prevent negative impacts on protected areas that fall under the categories I-IV of the International Union for Conservation of Nature (IUCN) within their business operations and the areas they manage.	Yes	– exclusion criterion: Controversial Environmental Practices (e.g. industrial activities high/unreversible negative impacts in IUCN categories I-IV)	
3	Companies prevent negative impacts on protected areas that fall under the Ramsar Convention on Wetlands within their business operations and the areas they manage.	Yes	– exclusion criterion: Controversial Environmental Practices (e.g. industrial activities in Unesco World Heritage sites protected for their environmental value) – exclusion criterion: Human Rights (e.g. industrial activities in Unesco World Heritage sites protected for their cultural value)	
4	Companies prevent the negative impact on protected areas that fall under the Ramsar Convention on Wetlands.	Yes	– exclusion criterion: Controversial Environmental Practices (e.g. industrial activities with high/unreversible negative impacts in Ramsar Wetlands)	
5	Companies prevent negative consequences for the populations or the number of animal species that are on the IUCN Red List of Threatened Species.	Yes	– exclusion criterion: Controversial Environmental Practices (e.g. industrial activities with high/unreversible negative impacts on threatened species) Biodiversity is considered in general for some high-exposure sectors (e.g. Metals&Mining, Construction). Both CITES and the IUCN Red List fall within our normative scope and are covered under the keyword "Failure to prevent depletion of biodiversity" (defined as: Activities that impact fragile ecosystems or areas that are known to be especially productive ecosystems, where the danger to a species has been cited.)	exclusion criterion: Corporate credits and Project finance (100 %)
6	Trade in endangered plant and animal species complies with the CITES conditions.	Yes	Both CITES and the IUCN Red List fall within our normative scope and are covered under the keyword "Failure to prevent depletion of biodiversity" (defined as: Activities that impact fragile ecosystems or areas that are known to be especially productive ecosystems, where the danger to a species has been cited.)	
7	Trade in endangered plant and animal species that are on the CITES lists is unacceptable.	No	Both CITES and the IUCN Red List fall within our normative scope and are covered under the keyword "Failure to prevent depletion of biodiversity" (defined as: Activities that impact fragile ecosystems or areas that are known to be especially productive ecosystems, where the danger to a species has been cited.)	exclusion criterion: Corporate credits and Project finance (100 %)
8	Activities in the field of genetic materials and genetic engineering only take place if they meet the permission and processing requirements as described in the UN Convention on Biological Diversity and the related Bonn Guidelines or Nagoya Protocol.	Yes	– Environmental aspects of products (Genetic modification) – Policy on human rights (Genetic resources and traditional knowledge) – Policy on genetically modified trees – Policy on the use of genetically modified cotton – Policy on the use of ingredients derived from genetically modified raw materials	

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

9	Production of, or trade in, living genetically modified organisms can only take place if permission has been obtained from the importing country and all requirements of the Cartagena Protocol have been met.	Yes	- Environmental aspects of products (Genetic modification) - Policy on human rights (Genetic resources and traditional knowledge) - Policy on genetically modified trees - Policy on the use of genetically modified cotton - Policy on the use of ingredients derived from genetically modified raw materials	
10	Companies prevent the introduction of invasive alien species in ecosystems	Yes	We meet this requirement as part of our positive criteria on biodiversity analogous to the IFC Performance Standards: "Companies control and prevent the introduction of alien invasive species and organisms into ecosystems." Any misconduct is detected via controversy screening and can lead to the exclusion of companies.	
11	Companies conduct water scarcity impact assessments and prevent negative impacts in water scarce regions.	Yes	- Environmental impact on biodiversity from vessel operations - Contractor standards on biodiversity protection from vessel operations - Water risk and impact (Activities and impacts in regions with high levels of water stress, Freshwater use inventories, Freshwater use reduction targets and action plans)	
12	Companies have comprehensive mitigation measures in place to address community and ecosystem water requirements in areas where environmental impact assessments identify that significant impacts to water resources are likely.	Yes	- Water risk and impact (Activities and impacts in regions with high levels of water stress) - Human rights due diligence procedures (Human rights risk and impact assessment) - exclusion criterion: Human Rights (e.g. industrial activities in Unesco World Heritage sites protected for their cultural value)	exclusion criterion: Corporate credits and Project finance (100 %)
13	Companies make an environmental impact assessment on the total consequences of a large scale project on biodiversity, at least according to GRI 304: Biodiversity 2016 or other relevant standards (mentioned in section 2.8.2).	Yes	- The requirement is made in the ESG Corporate Rating and we ask whether companies have established a biodiversity management system (e.g. GRI 304: Biodiversity 2016 or other relevant standards). - Biodiversity management (Risk and impact assessments, Consultation with biodiversity experts, Targets and objectives, Mitigation measures, Monitoring and evaluation)	
14	Companies integrate criteria on nature into their procurement and operational policies.	Yes	- Environmental supplier standard - Procedures to ensure compliance with the environmental supplier standard - Green procurement of office supplies	
15	Companies include clauses on the compliance with criteria on nature in their contracts with subcontractors and suppliers.	Yes	The requirement that companies include clauses on compliance with environmental criteria in their contracts with subcontractors and suppliers must be covered by the ESG Corporate Rating.	

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

Taxes			Genauere Definition des Kriteriums in der ISS ESG Ratingsystematik:		Darüber hinaus Ausschluss im Kundenkreditgeschäft (Corporate credits und Project finance)	
Fair finance Guide: The following elements are crucial for a policy regarding the companies a financial institution invests in:			Bestandteil Ratingsprozess			
9	Companies publish their full group structure, including indirectly and jointly-owned entities.		Yes	We set this requirement in the ESG Corporate Rating and check whether companies are committed to prohibiting tax avoidance (e.g. through transfer pricing). A positive rating of this element is required. Likewise, the topic of taxes is part of our controversial topics. ISS ESG considers the company structure when evaluating sustainability performance and assessing controversial business areas. E.g. subsidiaries, joint ventures, M&A processes.		
10	Companies publish an explanation of the activities, functions and ultimate shareholder of every subsidiary, branch, joint venture or affiliates located in jurisdictions with no or zero corporate tax practices or in jurisdictions with harmful corporate tax practices.		Yes	Tax base erosion and profit shifting (Transparency on presence in jurisdictions enabling tax base erosion and profit shifting). The transparency requirements extend to all branches and subsidiaries.	exclusion criterion: Corporate credits and Project finance (100 %)	
11	For each country in which companies operate, they report country-by-country on their revenues, profit, FTEs, subsidies from governments and payments to governments (e.g. withholding taxes, payments for concessions and company tax).		Yes	- Public disclosure of payments to government - Public disclosure of financial assistance received from governments		
12	Companies focus their international enterprise structure and their international transactions in a way that reflects the economic substance of the activities and transactions undertaken, without any steps made primarily to secure a tax advantage.		Yes	- Tax base erosion and profit shifting (Policy on presence in jurisdictions enabling tax base erosion and profit shifting) - Public disclosure of payments to government - Public disclosure of economic activity (Revenues by country, Production volume by country)		
13	Companies publish any company-specific tax rulings it has obtained from tax authorities.		Yes	- Public disclosure of payments to government - Public disclosure of financial assistance received from governments (including e.g. tax reliefs)		
14	Companies make public, to the extent legally and practically possible, the decision of any adjudication or arbitration to which it, or any of its subsidiaries, is a party, undertaken to resolve a tax dispute, whether in a court or in an arbitration setting.		Yes	We set this requirement in the ESG Corporate Rating and check whether companies make public, the decision of any adjudication or arbitration. A positive rating of this element is required. - Major controversies relating to financial relations with governments - Sustainability reporting - Major controversies relating to business ethics - Exclusion criterion: Business Malpractice (Taxes)		
15	Companies have a management system which results in immediate actions if suspicions arise that employees or suppliers are guilty of facilitating tax evasion.		Yes	- Code of conduct regarding fair business practices - Measures to ensure fair business practices		
16	Companies integrate criteria on tax in their procurement policies and operational policies.		Yes	We set this requirement in the ESG Corporate Rating and check whether companies integrate criteria on tax in their procurement policies and operational policies. A positive rating of this element is required. The criterion also concerns suppliers/supply chains of invested companies. tax base erosion and profit shifting		
17	Companies include clauses on the compliance with criteria on tax in their contracts with subcontractors and suppliers.		Yes	We meet this requirement by uncovering tax compliance in contracts with subcontractors and suppliers during controversy screening. It is important to us that our customer companies in investment and lending business integrate environmental, social and governance criteria into their operating guidelines. Examples of these include provisions on climate protection and anti-corruption, as well as compliance with human rights, labor rights and tax regulations. The same applies to gender-specific and women's rights criteria. We also expect our customer companies to include enforcement of these clauses in their contracts with subcontractors and suppliers.		

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

Corruption

Grundsätzliche Aussagen zum Themenfeld Corruption

Die Bank für Kirche und Diakonie verfügt über eine Organisationsanweisung zur "Verhinderung der Geldwäsche, der Terrorismusfinanzierung sowie der sonstigen strafbaren Handlungen". Diese Organisationsanweisung ist allen Mitarbeitenden der Bank zugänglich und von ihnen verbindlich zu beachten. Alle Angestellten der Bank haben entsprechende Schulungen erhalten und werden regelmäßig in Bezug auf die Prävention gegen strafbare Handlungen sensibilisiert. Gegenstand der Aufgaben ist unter anderem die Schaffung und Fortentwicklung einer institutsspezifischen, integrierten Risikoanalyse für Geldwäsche, Terrorismusfinanzierung und „strafbare Handlungen“ und die Koordination durch eine Zentrale Stelle. Zusätzlich ergänzen wir bestehende EDV-gestützte Monitoring- und Kontrollmaßnahmen sowie Arbeitsabläufe und nehmen institutsweite kunden- und mitarbeiterbezogene Sicherungsmaßnahmen sowie geführungsbezogene Überprüfungen der Wirksamkeit bereits installierter Prozesse vor. Dazu haben wir klare und einheitliche Berichtswege geschaffen. Durch die Auslagerung der Geldwäsche- und Betrugsprävention können wir unseren aufsichtsrechtlichen Pflichten effektiver und effizienter nachkommen.

Unser externer Dienstleister unterstützt uns in folgenden Aufgaben:

- Erstellung einer integrierten Risikoanalyse
- Regelmäßige Überprüfung der Gefährdungsanalyse
- Erstellung von Kontrollplänen
- Durchführung von IT-gestützten Kontrollen und zusätzlich buchbaren Vor-Ort Kontrollen (durch Compliance-Spezialisten)
- Erstellung der Arbeitsanweisung Geldwäsche- und Betrugsprävention
- Schulung und Information der Mitarbeiter
- Bearbeitung von hausinternen Mitteilungen
- Erstellung Geldwäsche-Verdachtsmeldungen
- Geno-SONAR®: Einrichtung, Bearbeitung und Pflege
- Überwachung und Monitoring mit Geno-SONAR®
- Nutzung des zentralen Verdachtspools der DZ CompliancePartner GmbH
- Ansprechpartner für Mitarbeiter und Behörden
- Kontakt zu Strafverfolgungsbehörden

Mithilfe von Geno-SONAR® werden geldwäsche-relevante Tatbestände bzw. Verdachtsfälle in unserem rechnungslegungsrelevanten System agree21 erkannt und berichtet.

Fair finance Guide: The following elements are crucial for a policy regarding the companies a financial institution invests in:

	Bestandteil Ratingsprozess	Genaue Definition des Kriteriums in der ISS ESG Ratingsystematik:	Darüber hinaus Ausschluss im Kundenkreditgeschäft (Corporate credits und Project finance)
7	Companies publicly disclose their ultimate beneficial owner or owners including full name, date of birth, nationality, jurisdiction of residence, number and categories of shares, and if applicable the proportion of shareholding or control.	Yes	We comply with this requirement by checking the beneficial owners and looking to see if there is a controlling shareholder or representatives on the board of directors of major shareholders who exert influence. We apply strict guidelines to our investments, comparable to the EU's Fourth Anti-Money Laundering Directive (AMLD). Conspicuous lead to the exclusion of the company. - Shareholder structure (disclosure of holder types); details on shareholders are usually available to ISS ESG.
8	Offering, promising, giving and requiring, either directly or indirectly, bribes and other undue advantages in order to acquire and to maintain assignments and other undue advantages, is unacceptable.	Yes	Ausschluss von kontroversen Geschäftspraktiken: Als Verstoß gelten Fälle massiver Missachtung von gesetzlichen Vorschriften oder allgemein anerkannter Wohlverhaltensregeln im Bereich der Korruption, zum Beispiel durch die Annahme von Bestechungsgeldern sowie die Bestechung Dritter.
9	Companies have a management system which results in immediate actions if suspicions arise that employees or suppliers are guilty of corruption.	Yes	Code of conduct regarding fair business practices, "Measures to ensure fair business practices"
10	Companies report on their participation in the decision-making processes of international norms and legislation (lobby practices).	Yes	Transparency on participation in public policy making and lobbying activities
11	Companies integrate criteria on corruption in their procurement policies and operational policies.	Yes	- Code of business ethics: Corruption - Compliance procedures: Third party anti-corruption due diligence
12	Companies include clauses on the compliance with criteria on corruption in their contracts with subcontractors and suppliers.	Yes	The requirement to introduce third-party anti-corruption due diligence procedures exists in the area of the Code of Ethics and specifically in the area of the associated compliance measures. - Compliance procedures: Third party anti-corruption due diligence

Arms

Fair finance Guide: The following elements are crucial for a policy regarding the companies a financial institution invests in:

Bestandteil Ratingsprozess	Genaue Definition des Kriteriums in der ISS ESG Ratingsystematik:	Darüber hinaus Ausschluss im Kundenkreditgeschäft (Corporate credits und Project finance)
----------------------------	---	---

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

1	Use, production, development, maintenance, testing, stockpiling of and trade in anti-personal landmines, including key components of landmines, is unacceptable.	Yes	- Exclusion criterion: military (producers banned weapons)	exclusion criterion: Corporate credits and Project finance (100 %)
2	Use, production, development, maintenance, testing, stockpiling of and trade in cluster munitions, including key components of cluster munitions, is unacceptable.	Yes	- Exclusion criterion: military (producers banned weapons)	exclusion criterion: Corporate credits and Project finance (100 %)
3	Use, production, development, maintenance, testing, stockpiling of and trade in nuclear weapons, including key components of nuclear weapons, in or to countries that have not ratified the Non-proliferation Treaty is unacceptable.	Yes	- Exclusion criterion: military (producers banned weapons)	exclusion criterion: Corporate credits and Project finance (100 %)
4	Use, production, development, maintenance, testing, stockpiling of and trade in nuclear weapons, including key components of nuclear weapons, is unacceptable.	Yes	- Exclusion criterion: military (producers banned weapons)	exclusion criterion: Corporate credits and Project finance (100 %)
5	Use, production, development, maintenance, testing, stockpiling of and trade in chemical weapons, including key components of chemical weapons, is unacceptable.	Yes	- Exclusion criterion: military (producers banned weapons)	exclusion criterion: Corporate credits and Project finance (100 %)
6	Use, production, development, maintenance, testing, stockpiling of and trade in biological weapons, including key components of biological weapons, is unacceptable.	Yes	- Exclusion criterion: military (producers banned weapons)	exclusion criterion: Corporate credits and Project finance (100 %)
7	Use, production, development, maintenance, testing, stockpiling of and trade in lethal autonomous weapons systems (LAWS), including components designed for LAWS, is unacceptable.	Partly	The production and trade of LAWS is unacceptable. This is covered by 'military products'. Currently, no clear definition exists on an international accepted level as to what systems qualify as LAWS within the supply chain / production of key components. KD-Bank and ISS are in intense discussions to find a solution.	
8	Goods that are essential for military purposes, but can also be used for civilian products ('dual-use' goods), are considered as military goods when they have a non-civilian purpose.	Yes	We meet this requirement by defining dual-use products as military goods if they have a strategic non-civilian purpose. We are guided by the EU Code of Conduct for Arms Export: "The criteria in this Code and the consultation procedure provided for by paragraph 2 of the operative provisions will also apply to dual-use goods as specified in Annex 1 of Council Decision 94/942/CFSP as amended, where there are grounds for believing that the end-user of such goods will be the armed forces or internal security forces or similar entities in the recipient country." In particular, violations and findings within the scope of our controversy screening can lead to the exclusion of the company if our engagement activities have no effect.	
9	Supply of arms and weapons systems, military transport systems, and other military goods to countries that are under a United Nations or relevant multilateral arms embargo, is unacceptable.	Yes	- Exclusion criterion: supply of military goods (> 5 % of net sales)	exclusion criterion: Corporate credits and Project finance (100 %)
10	Supply of arms and weapons systems, military transport systems, and other military goods is unacceptable if there is an overriding risk that the arms will be used for serious violation of international human rights and humanitarian rights.	Yes	- Exclusion criterion: supply of military goods (> 5 % of net sales)	exclusion criterion: Corporate credits and Project finance (100 %)
11	Supply of arms and weapons systems, military transport systems, and other military goods to countries that violate human rights, is unacceptable.	Yes	- Exclusion criterion: supply of military goods (> 5 % of net sales)	exclusion criterion: Corporate credits and Project finance (100 %)
12	Supply of arms and weapon systems, military transport systems, and other military goods to parties involved in conflict is unacceptable, unless to parties acting in accordance with a UN Security Council resolution.	Yes	- Exclusion criterion: supply of military goods (> 5 % of net sales)	exclusion criterion: Corporate credits and Project finance (100 %)
13	Supply of arms and weapons systems, military transport systems, and other military goods to countries that are sensitive to corruption, is unacceptable.	Yes	- Exclusion criterion: supply of military goods (> 5 % of net sales)	exclusion criterion: Corporate credits and Project finance (100 %)

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

14	Supply of arms and weapons systems, military transport systems, and other military goods to countries having a failed or fragile state, is unacceptable.	Yes	- Exclusion criterion: supply of military goods (> 5 % of net sales)	exclusion criterion: Corporate credits and Project finance (100 %)
15	Supply of arms and weapons systems, military transport systems, and other military goods to countries that spend a disproportionate part of their budget on purchases of arms, is unacceptable.	Yes	- Exclusion criterion: supply of military goods (> 5 % of net sales)	exclusion criterion: Corporate credits and Project finance (100 %)
	The policy does not mention exceptions for certain types of investment, financing and/or asset classes of the financial institution.	Yes		exclusion criterion: Corporate credits and Project finance (100 %)
	The policy does not mention exceptions for activities or projects that are not related to the production of weapons.	Yes		exclusion criterion: Corporate credits and Project finance (100 %)
Forestry				
Fair finance Guide: The following elements are crucial for a policy regarding the companies a financial institution invests in:				
1	Forest construction companies identify and protect the High Conservation Value (HCV) areas within the forests they manage.	Bestandteil Ratingsystematik	Genaue Definition des Kriteriums in der ISS ESG Ratingsystematik:	Bardeier Hinweis: Anschluss im Kundenkreditgeschäft (Corporate credits und Project finance)
3	Companies throughout the wood supply chain prevent the use of illegally cut and traded timber.	Yes	- Forest/plantation management	Corporate credits and Project finance: exclusion of companies in the forestry sector by articles of the association
		Yes	- Sourcing of fresh wood/fibre (Measures to exclude procurement of fresh wood/fibre from unsustainable sources)	Corporate credits and Project finance: exclusion of companies in the forestry sector by articles of the association
4	Pulp and paper factories restrict the use of chemicals and the pollution of soil, water and air by making use of the best available techniques.	Yes	- Requirements regarding wastewater treatment at mills - Measures regarding reduction / responsible use of controversial chemicals - Use of environmentally preferable bleaching processes - Policy on sustainable forest/plantation management - Measures regarding sustainable forest/plantation management	Corporate credits and Project finance: exclusion of companies in the forestry sector by articles of the association
5	Companies respect the rights of local and indigenous communities on the fair and equal use of forests.	Yes	- Policy on human rights (Indigenous peoples and traditional livelihoods)	Corporate credits and Project finance: exclusion of companies in the forestry sector by articles of the association
6	Companies prevent conflicts over land rights and acquire natural resources only by engaging in meaningful consultation with local communities and obtaining free, prior and informed consent (FPIC) when it concerns indigenous peoples.	Yes	- Policy on human rights (e.g. resettlement and compensation; indigenous peoples and traditional livelihoods)	Corporate credits and Project finance: exclusion of companies in the forestry sector by articles of the association
7	Companies prevent conflict over land rights and acquire natural resources only with free, prior and informed consent (FPIC) of peoples with customary tenure rights.	Yes	Companies may only advertise natural resources if they obtain them with the consent of free, prior and informed indigenous peoples and people with traditional tenure rights. We meet this requirement in the ESG Corporate Rating under the item policy on human rights and check whether companies commit to this principle. Companies that do not meet this point are excluded if our engagement activities do not have an impact. In addition, this point is an important part of the controversy screening. - Policy on human rights (e.g. resettlement and compensation; indigenous peoples and traditional livelihoods) FSC certification is very important to us. We fulfill this requirement by asking this item in the ESG company assessment. It is part of our engagement activities. Companies that stand out negatively here are revealed in the controversy screening. A violation will result in exclusion of the company. Forest/plantation area certified to sustainable forest management standards, including FSC certification. This indicator assesses the percentage of wood (products) sold/produced by the company certified to sustainable forest management standards.	Corporate credits and Project finance: exclusion of companies in the forestry sector by articles of the association
8	Production forests and timber plantations are certified according to the criteria of the Forest Stewardship Council (FSC).	Yes		Corporate credits and Project finance: exclusion of companies in the forestry sector by articles of the association

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

9	Production chains of timber traders and companies in the wood product chain (including pulp, paper, veneer, furniture) are certified according to the FSC Chain of Custody criteria.	Yes	FSC certification is very important to us. We fulfill this requirement by asking this item in the ESG company assessment. It is part of our engagement activities. Companies that stand out negatively here are revealed in the controversy screening. A violation will result in exclusion of the company. - Procurement of fresh wood/fibre certified to sustainable forest management standards Forest/plantation area certified to sustainable forest management standards, including FSC certification. This indicator assesses the percentage of wood (products) sold/produced by the company certified to sustainable forest management standards.	Corporate credits and Project finance: exclusion of companies in the forestry sector by articles of the association
11	Companies publish a sustainability report that may contain (a number of) the Standard Disclosures from the GRI G4 Sustainability Reporting Guidelines.	Yes	- Sustainability reporting (Reporting topics, Reporting quality, Assurance of reporting) Der GRI-Standard hat die Entwicklung der Research-Methodik stark geprägt. Eine Konformität kann sich positiv in der Bewertung eines Unternehmens widerspiegeln. Andere Reportings können jedoch ebenso berücksichtigt werden.	Corporate credits and Project finance: exclusion of companies in the forestry sector by articles of the association
12	Large enterprises and multinational enterprises publish a sustainability report that is set up in accordance with the GRI G4 Sustainability Reporting Guidelines.	Yes	- Sustainability reporting (Reporting topics, Reporting quality, Assurance of reporting)	Corporate credits and Project finance: exclusion of companies in the forestry sector by articles of the association
13	Companies integrate social, economic and environmental criteria in their procurement and operational policies.	Yes	- Environmental supplier standard - Procedures to ensure compliance with the environmental supplier standard - Supplier standards with regard to labour rights and working conditions - Procedures to ensure compliance with supplier standards on labour rights and working conditions - Measures to enable key suppliers to safeguard labour rights and improve working conditions	Corporate credits and Project finance: exclusion of companies in the forestry sector by articles of the association
14	Companies include clauses on the compliance with environmental, social and governance criteria in their contracts with subcontractors and suppliers.	Yes	We meet the requirement to include clauses on compliance with environmental, social and governance criteria in their contracts with subcontractors and suppliers in the rating under Supplier Code of conduct. Depending on the industry, further sub-items must be fulfilled. The Supplier Code of conduct must be complied with.	
Food				
Fair finance Guide: The following elements are crucial for a policy regarding the companies a financial institution invests in:		Bestandteil Ratingsprozess	Genauere Definition des Kriteriums in der ISS ESG Ratingsystematik:	
1	Companies respect the right to adequate food.	Yes	- Policy on human rights	Darüber hinaus Ausschluss im Kundenkreditgeschäft (Corporate credits und Project finance) Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
2	Companies respect the ILO Declaration on Fundamental Principles and Rights at Work.	Yes	see "labour rights" folder	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
3	Companies prevent conflicts over land rights and acquire natural resources only by engaging in meaningful consultation with local communities and obtaining free, prior and informed consent (FPIC) when it concerns indigenous peoples.	Yes	- Policy on human rights (e.g. resettlement and compensation; indigenous peoples and traditional livelihoods)	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
4	Companies prevent conflict over land rights and acquire natural resources only with free, prior and informed consent (FPIC) of peoples with customary tenure rights.	Yes	The requirement is mapped in the ESG Corporate Rating under the item Policy on Human Rights. We explicitly include the United Nations Guiding Principles on Business and Human Rights (UNGPs) and the Free Prior Informed Consent (FPIC) Principles, which are designed to secure and protect the rights of indigenous peoples and all people with traditional tenure rights. - Policy on human rights (e.g. resettlement and compensation; indigenous peoples and traditional livelihoods)	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

5	Companies prevent negative impacts on protected areas that fall under the categories I-IV of the International Union for Conservation of Nature (IUCN) within their business operations and the areas they manage.	Yes	– Policy on sustainable agricultural practices in company and supply chain – Measures to promote sustainable agricultural practices in company and supply chain – Stock farming in company and supply chain: Measures to ensure sustainable animal feed – Measures to ensure sustainable fish farming in company and supply chain – Policy on sustainable agricultural practices in company and supply chain – Measures to promote sustainable agricultural practices in company and supply chain – Stock farming in company and supply chain: Measures to ensure sustainable animal feed – Measures to ensure sustainable fish farming in company and supply chain – Policy on sustainable agricultural practices in company and supply chain – Measures to promote sustainable agricultural practices in company and supply chain – Stock farming in company and supply chain: Measures to ensure sustainable animal feed – Measures to ensure sustainable fish farming in company and supply chain	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
6	Companies prevent negative impacts on UNESCO World Heritage sites within their business operations and the areas they manage.	Yes	– Policy on sustainable agricultural practices in company and supply chain – Measures to promote sustainable agricultural practices in company and supply chain – Stock farming in company and supply chain: Measures to ensure sustainable animal feed – Measures to ensure sustainable fish farming in company and supply chain – Policy on sustainable agricultural practices in company and supply chain – Measures to promote sustainable agricultural practices in company and supply chain – Stock farming in company and supply chain: Measures to ensure sustainable animal feed – Measures to ensure sustainable fish farming in company and supply chain	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
7	Companies prevent negative impacts on protected areas that fall under the Ramsar Convention on Wetlands within their business operations and the areas they manage.	Yes	– Policy on sustainable agricultural practices in company and supply chain – Measures to promote sustainable agricultural practices in company and supply chain – Stock farming in company and supply chain: Measures to ensure sustainable animal feed – Measures to ensure sustainable fish farming in company and supply chain – Policy on sustainable agricultural practices in company and supply chain – Measures to promote sustainable agricultural practices in company and supply chain – Stock farming in company and supply chain: Measures to ensure sustainable animal feed – Measures to ensure sustainable fish farming in company and supply chain	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
8	Activities in the field of genetic materials and genetic engineering only take place if they meet the permission and processing requirements described in the UN Convention on Biological Diversity and the related Bonn Guidelines or Nagoya Protocol.	Yes	– Environmental aspects of products (Genetic modification) – Policy on human rights (Genetic resources and traditional knowledge) – Policy on genetically modified trees – Policy on the use of genetically modified cotton – Policy on the use of ingredients derived from genetically modified raw materials	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
9	Production of, and trade in, living genetically modified organisms can only take place if permission of the importing country has been obtained and all requirements of the Cartagena Protocol have been met.	No		Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
10	Companies respect the Five Freedoms of animals.	Yes	– Stock farming in company and supply chain: Measures to ensure animal welfare on the farm, during transport and slaughter or killing – Animal welfare standards (a Breeds, b Living environment, c Mutilation, d Feed and medication, e Transportation, f slaughter) – Measures to ensure and promote animal welfare (a Procedures to ensure animal welfare on the farm, during transport and slaughter, b Promoting knowledge and innovation regarding animal welfare) – Major controversies relating to animal welfare	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
11	Very restricted housing methods for calves (in crates), hens (in battery cages) and sows (in feeding cubicles) are unacceptable.	Yes		exclusion criterion: Corporate credits and Project finance (100 %)
12	Companies limit the duration of animal transports in line with best-practice standards.	Yes	– Animal welfare standards (e Transportation)	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
13	Companies apply a prudent use of antimicrobial medicines (antibiotics) in food-producing animals in order to minimize antimicrobial resistance.			
14	Companies reduce their direct and indirect greenhouse gas emissions.	Yes	– Greenhouse gas emission reduction targets and action plans – Greenhouse gas emission intensity	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

15	Companies reduce their direct and indirect emission of harmful substances, such as particulate matter, nitrogen oxide and ammonia.	Yes	- Greenhouse gas emission reduction targets relating to agricultural production along the value chain - Measures to reduce climate impacts of agricultural production along the value chain - Major controversies relating to the climate impact of agricultural production along the value chain - Greenhouse gas emission intensity (agricultural production) - COD emission intensity - Waste intensity	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
16	Conversion of peatland and high-carbon stocks for agricultural development is unacceptable	Yes	- Greenhouse gas emission reduction targets relating to agricultural production along the value chain - Measures to reduce climate impacts of agricultural production along the value chain - Major controversies relating to the climate impact of agricultural production along the value chain	exclusion criterion: Corporate credits and Project finance (100 %)
17	Companies contribute to an ambitious, time-bound shift from animal protein to plant and alternative proteins in order to decrease animal protein consumption.	Yes	- We meet this requirement by encouraging companies to adopt policies that contribute to a switch from animal proteins to plant-based and alternative proteins and reduce the consumption of animal proteins. The requirement is part of our positive criteria and engagement activities. Company policies should be ambitious and time-bound. - Policy on sustainable agricultural practices in company and supply chain - Measures to promote sustainable agricultural practices in company and supply chain - Stock farming in company and supply chain: Measures to ensure sustainable animal feed - Measures to ensure sustainable fish farming in company and supply chain	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
18	Companies minimise use of pesticides.	Yes	- Position on water conservation in agricultural production along the value chain - Measures to ensure water conservation in agricultural production along the value chain - Major controversies relating to water conservation in agricultural production along the value chain - Policy on sustainable agricultural practices in company and supply chain - Measures to promote sustainable agricultural practices in company and supply chain - Stock farming in company and supply chain: Measures to ensure sustainable animal feed	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
18	Companies use as little water as possible.	Yes	- Position on water conservation in agricultural production along the value chain - Measures to ensure water conservation in agricultural production along the value chain - Major controversies relating to water conservation in agricultural production along the value chain - Policy on sustainable agricultural practices in company and supply chain - Measures to promote sustainable agricultural practices in company and supply chain - Stock farming in company and supply chain: Measures to ensure sustainable animal feed	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
19	Companies minimise use of water.	Yes	Position on water conservation in agricultural production along the value chain", "Measures to ensure water conservation in agricultural production along the value chain", "Major controversies relating to water conservation in agricultural production along the value chain", "Policy on sustainable agricultural practices in company and supply chain", "Measures to promote sustainable agricultural practices in company and supply chain", "Stock farming in company and supply chain: Measures to ensure sustainable animal feed"	Über die im Nachhaltigkeitsfilter genannten Branchen hinaus, schließen wir daher u.a. Kundenkredite und Projektfinanzierungen in folgenden Bereichen aus: industrielle Nahrungsmittelproduktion
20	Companies prevent water pollution.	Yes	- Soil and biodiversity management in agricultural production - Impact of aquaculture and fisheries on aquatic ecosystems - Measures to ensure sustainable aquaculture along the value chain - COD emission intensity	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

21	Companies conduct water scarcity impact assessments and prevent negative impacts in water scarce regions.	Yes	Water risk and impact (Activities and impacts in regions with high levels of water stress, Freshwater use inventories, Freshwater use reduction targets and action plans)	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
23	Companies work with relevant standards and initiatives for raw materials (mentioned in section 3.4.2).	Yes	- Share of raw materials from certified organic farming - Percentage of certified palm oil	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
24	Companies are certified according to the criteria of the certification schemes for raw materials (mentioned in section 3.4.2).	Yes	- Share of raw materials from certified organic farming - Percentage of certified palm oil	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
25	Companies publish a sustainability report that may contain (a number of) disclosures from the GRI Standards.	Yes	Sustainability reporting Der GRI-Standard hat die Entwicklung der Reserach-Methodik stark geprägt. Eine Konformität kann sich positiv in der Bewertung eines Unternehmens widerspiegeln. Andere Reportings können jedoch ebenso berücksichtigt werden.	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
26	Large enterprises and multinational enterprises publish a sustainability report that is set up in accordance with the (Core or Comprehensive option of) GRI Standards.	Yes	Sustainability reporting (Reporting topics, Reporting quality, Assurance of reporting) Der GRI-Standard hat die Entwicklung der Reserach-Methodik stark geprägt. Eine Konformität kann sich positiv in der Bewertung eines Unternehmens widerspiegeln. Andere Reportings können jedoch ebenso berücksichtigt werden.	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
27	Companies integrate social, economic and environmental criteria in their procurement and operational policies.	Yes	- Environmental supplier standard - Procedures to ensure compliance with the environmental supplier standard - Green procurement of office supplies - Supplier standards with regard to labour rights and working conditions - Procedures to ensure compliance with supplier standards on labour rights and working conditions - Measures to enable key suppliers to safeguard labour rights and improve working conditions	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association
28	Companies include clauses on the compliance with social, economic and environmental criteria in their contracts with subcontractors and suppliers.	Yes	We include the requirement to include clauses on compliance with environmental, social and governance criteria in contracts with subcontractors and suppliers in the rating under Supplier code of conduct. The Supplier code of conduct must be complied with. - Environmental supplier standard - Procedures to ensure compliance with the environmental supplier standard - Green procurement of office supplies - Supplier standards with regard to labour rights and working conditions - Procedures to ensure compliance with supplier standards on labour rights and working conditions - Measures to enable key suppliers to safeguard labour rights and improve working conditions	Corporate credits and Project finance: exclusion of companies in the food sector by articles of the association

Monitoring and evaluation	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector	
3	Companies prevent negative impact on protected areas that fall under the Ramsar Convention on Wetlands.	Yes			

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

4	Companies mitigate the chance of accidents by making use of the best available techniques and have a solid road map for crisis situations (a so-called 'contingency plan').	Yes	- Facility safety management a. Responsibilities and training b. Risk assessments c. Performance monitoring and incident investigation d. Inspections and maintenance - Emergency response and preparedness a. Emergency response plan b. Emergency drills c. Emergency cooperation d. Crisis communication	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
5	Companies do not operate in locations where the consequences of an accident for the environment are unmanageable.	Yes	We meet this requirement because we believe companies have a special responsibility to society. This also applies to operations at high-risk sites. We define sites as risky if they are occupied under international humanitarian law or if day-to-day operations or accidents could lead to uncontrollable consequences for the environment and society. In particular, violations and controversies in this area can lead to the exclusion of the company. Exclusion criterion: controversial environmental practices - Tailings and waste rock management a. Asset integrity b. Progressive tailings processing and treatment techniques c. Safety and emergency preparedness d. Acid Mine Drainage management	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
6	Companies reduce extractive waste and manage and process this in a responsible way by adequately tracking, reviewing and acting to improve their tailings risk management and by adopting a zero-failure objective to tailings storage facilities.	Yes	We agree with that. We fulfill this requirement as part of our assessment of the ratings of relevant companies as an industry-specific issue. This point is also covered in the area of controversy screening. Riverine tailings disposal and sub-marine tailings leads to exclusion of the company. Exclusion criterion: controversial environmental practices - Water risk and impact (Activities and impacts in regions with high levels of water stress, Freshwater use inventories, Freshwater use reduction targets and action plans) - Water risk and impact (Activities and impacts in regions with high levels of water stress) - Policy on human rights (Right to water) - Human rights due diligence procedures	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
7	Riverine tailings disposal and sub-marine tailings disposal is unacceptable.	Yes	We fulfill this requirement as part of our assessment of the ratings of relevant companies as an industry-specific issue. This point is also covered in the area of controversy screening. Relevant standards such as "International Council on Mining and Metals Principles" or "IFC Environmental Health and Safety Guidelines" are taken into account. Any violation will lead to the exclusion of the company. Standards for site closure, decommissioning and reclamation a. Multi-stakeholder approach b. Financial provisions c. Environmental considerations	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
8	Companies conduct water scarcity impact assessments and prevent negative impacts in water scarce regions.	Yes	We fulfill this requirement as part of our assessment of the ratings of relevant companies as an industry-specific issue. This point is also covered in the area of controversy screening. Relevant standards such as "International Council on Mining and Metals Principles" or "IFC Environmental Health and Safety Guidelines" are taken into account. Any violation will lead to the exclusion of the company. Standards for site closure, decommissioning and reclamation a. Multi-stakeholder approach b. Financial provisions c. Environmental considerations	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
9	Companies have comprehensive mitigation measures in place to address community and ecosystem water requirements in areas where environmental impact assessments identify that significant impacts to water resources are likely.	Yes	We fulfill this requirement as part of our assessment of the ratings of relevant companies as an industry-specific issue. This point is also covered in the area of controversy screening. Relevant standards such as "International Council on Mining and Metals Principles" or "IFC Environmental Health and Safety Guidelines" are taken into account. Any violation will lead to the exclusion of the company. Standards for site closure, decommissioning and reclamation a. Multi-stakeholder approach b. Financial provisions c. Environmental considerations	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
10	Companies include the environmental and health effects of a mine after its closure in plans for the development of new mines.	Yes	We fulfill this requirement as part of our assessment of the ratings of relevant companies as an industry-specific issue. This point is also covered in the area of controversy screening. Relevant standards such as "International Council on Mining and Metals Principles" are taken into account. - Standards for site closure, decommissioning and reclamation - Percentage of projects with a mine closure plan in place - Monitoring and evaluation of closed and/or decommissioned sites	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
11	Companies ensure the complete recovery of ecosystems after commercial activities have been completed, for all extractive industry projects (i.e. this is included as an activity in the planning and the budget of the project).	Yes	We fulfill this requirement as part of our assessment of the ratings of relevant companies as an industry-specific issue. This point is also covered in the area of controversy screening. Relevant standards such as "International Council on Mining and Metals Principles" are taken into account. - Standards for site closure, decommissioning and reclamation - Percentage of projects with a mine closure plan in place - Monitoring and evaluation of closed and/or decommissioned sites	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

12	Companies enhance small scale and artisanal mining that improves sustainable economic and social development on a local level.	Yes	This requirement is queried in the rating of relevant companies as an industry-specific issue. Violations are recorded in the controversy screening. If our engagement activities do not take effect, any violations can lead to the exclusion of the company. - Policy on human rights (Traditional livelihoods) - Human rights due diligence procedures - Community outreach and consultation - Community involvement - Freedom of association - Equal opportunities and non-discrimination - Pay and benefits - Worklife balance - Health and safety - Training	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
13	Companies respect the ILO Declaration on Fundamental Principles and Rights at work.	Yes	- Policy on human rights - Human rights due diligence procedures - Human rights risk and impact assessment ii. Human rights trainings iii. Integration of stakeholders in human rights management iv. Monitoring and auditing v. Grievance and remedies - Community outreach and consultation	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
14	Companies prevent conflicts over land rights and acquire natural resources only by engaging in meaningful consultation with local communities and obtaining free, prior and informed consent (FPIC) when it concerns indigenous peoples.	Yes	- Policy on human rights - Human rights due diligence procedures - Human rights risk and impact assessment ii. Human rights trainings iii. Integration of stakeholders in human rights management iv. Monitoring and auditing v. Grievance and remedies - Community outreach and consultation	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
15	Companies prevent conflict over land rights and acquire natural resources only with free, prior and informed consent (FPIC) of peoples with customary tenure rights.	Yes	We fulfill the requirement in the ESG Corporate Rating under the item policy on human rights and check whether companies are committed to this principle. In addition, this point is covered in the controversy screening. Our goal is to secure and protect the rights, and in particular the land rights, of indigenous peoples and all people with traditional property rights. - Policy on human rights (e.g. resettlement and compensation; indigenous peoples and traditional livelihoods) - Community outreach and consultation	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
16	Companies follow the Voluntary Principles on Security and Human Rights for the security of their employees and company premises.	Yes	- Policy on human rights	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
17	Companies have processes to enable the remediation of any adverse human rights impact to which they cause or to which they contribute.	Yes	- Policy on human rights - Community outreach and consultation	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
18	Companies pay taxes owed in each country where they operate	Yes	- Tax base erosion and profit shifting - a Transfer pricing - b Presence in jurisdictions enabling tax base erosion and profit shifting - i Position on presence in jurisdictions enabling tax base erosion and profit shifting - ii Transparency on presence in jurisdictions enabling tax base erosion and profit shifting: - Public disclosure of payments to government - a Payments by country - b Types of payments - Public disclosure of economic activity - a Employees by country: - b Revenues by country: - c Profits by country: - Public disclosure of financial assistance received from governments - Major controversies relating to financial relations with governments - Major controversies relating to business ethics	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

19	For each country in which companies operate, they report country-by-country on their revenues, FTEs, subsidies received from governments and payments to governments (e.g. withholding taxes, payments for concessions and company tax).	Yes	- Public disclosure of payments to government - Public disclosure of financial assistance received from governments	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
20	Offering, promising, giving and requiring, either directly nor indirectly, bribes or other undue advantages in order to acquire or to maintain assignments or other undue advantages, is unacceptable.	Yes	Exclusion criterion: korruption, Corporate Governance-Kodex für Genossenschaften, Punkt 4.3.2	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
21	Companies only operate in weak governance zone or conflict-affected areas if they are able to demonstrate that they are not causing or contributing to human rights abuses.	Yes	Companies operating in conflict areas or industries must meet higher requirements and demonstrate that they do not cause or contribute to human rights abuses. We fulfill this requirement in the ESG Corporate Rating in the area of policy on human rights and check whether companies recognize their commitment to this principle. In addition, this point is covered in the controversy screening. Companies that violate this requirement are excluded. - Policy on human rights - Human rights due diligence procedures i. Human rights risk and impact assessment ii. Human rights trainings iii. Integration of stakeholders in human rights management iv. Monitoring and auditing v. Grievance and remedies - Major controversies relating to human rights	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
22	Mining and trading in conflict materials is unacceptable.	Yes	- We do not accept the mining and trading of conflict minerals. We fulfill this point in the rating assessment as an industry-specific issue. Furthermore, this is an important part of the controversy screening. Companies that violate this requirement are excluded. - Promotion of transparency and certification of origin in ore and metal trade chains - Transparency on accessibility and types of reserves - Major controversies relating to customer and product responsibility - Policy on human rights - Human rights due diligence procedures i. Human rights risk and impact assessment ii. Human rights trainings iii. Integration of stakeholders in human rights management iv. Monitoring and auditing v. Grievance and remedies - Major controversies relating to human rights	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
23	Uranium mining is unacceptable.	Yes	Exclusion criterion: nuclear power (producer/mining uranium > 5% of net sales)	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
24	Asbestos mining is unacceptable.	Yes	That's right. Asbestos mining is unacceptable. We fulfill this requirement through the control screening in the Norm-Based Research in the field of Environment. Companies that violate this requirement are excluded.	
25	Mountaintop removal mining is unacceptable.	Yes	Exclusion criterion: coal producers (> 5% of net sales)	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
26	Establishing new coal mines is unacceptable	Yes	Exclusion criterion: coal producers (> 5% of net sales)	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
27	Thermal coal mining is unacceptable.	Yes	Exclusion criterion: coal producers (> 5% of net sales)	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
	Metallurgical coal mining is unacceptable.	Yes	Exclusion criterion: coal producers (> 5% of net sales)	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

28	Companies work with relevant standards and initiatives for certain minerals (mentioned in section 3.8.2).	Yes	We will exclude companies that do not comply with relevant standards and initiatives for certain minerals if our engagement activities do not have an impact. We fulfill this requirement when rating companies as an industry-specific issue. In addition, this item is an important part of the controversy screening process. - Promotion of transparency and certification of origin in ore and metal trade chains	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
29	Companies are certified according to the criteria of certification schemes for certain minerals (mentioned in section 3.8.2).	Yes	Companies that do not use certification systems and do not certify certain minerals are excluded by us if our engagement activities do not have an impact. We fulfill this requirement when rating companies as an industry-specific issue. In addition, this item is an important part of the controversy screening process. - Promotion of transparency and certification of origin in ore and metal trade chains	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
30	Companies publish a sustainability report that may contain (a number of) the Standard Disclosures of the GRI G4 Sustainability Reporting Guidelines.	Yes	- Sustainability reporting Der GRI-Standard hat die Entwicklung der Research-Methodik stark geprägt. Eine Konformität kann sich positiv in der Bewertung eines Unternehmens widerspiegeln. Andere Reportings können jedoch ebenso berücksichtigt werden.	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
31	Companies publish a sustainability report that may contain (a number of) disclosures from the GRI Standards.	Yes	- Sustainability reporting (Reporting topics, Reporting quality, Assurance of reporting) Der GRI-Standard hat die Entwicklung der Research-Methodik stark geprägt. Eine Konformität kann sich positiv in der Bewertung eines Unternehmens widerspiegeln. Andere Reportings können jedoch ebenso berücksichtigt werden.	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
32	Companies integrate social, economic and environmental criteria in their procurement and operational policies.	Yes	- Environmental supplier standard - Procedures to ensure compliance with the environmental supplier standard - Green procurement of office supplies - Supplier standards with regard to labour rights and working conditions - Procedures to ensure compliance with supplier standards on labour rights and working conditions - Measures to enable key suppliers to safeguard labour rights and improve working conditions	Corporate credits and Project finance: exclusion of companies with business segments in the mining sector
33	Companies include clauses on the compliance with environmental, social and governance criteria in their contracts with subcontractors and suppliers.	Yes	Companies that do not include clauses on compliance with environmental, social and governance criteria in their contracts with subcontractors and suppliers are excluded if our engagement activities do not have an impact. We meet this requirement in the rating under the Supplier Code of Conduct item. Depending on the industry, further sub-points must also be fulfilled. In addition, this point is an important part of the controversy screening.	
Oil & Gas				
Fair finance Guide: The following elements are crucial for a policy regarding the companies a financial institution invests in:		Bestandteil Ratingprozess	Genauere Definition des Kriteriums in der ISS ESG Ratingsystematik:	Darüber hinaus Ausschluss im Kundenkreditgeschäft (Corporate credits und Project finance)

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

1	Companies prevent negative impact on protected areas that fall under the categories I-IV of the International Union for Conservation of Nature (IUCN).	– Protected areas a. Policy on activities in protected areas and further areas of particular importance for biodiversity b. Activities in protected areas and further areas of particular importance for biodiversity c. Disclosure of the number of projects within protected areas and further areas of particular importance for biodiversity – Biodiversity management a. Risk and impact assessments b. Consultation with biodiversity experts c. Targets and objectives d. Mitigation measures e. Monitoring and evaluation Anmerkung Rankabrand: Adherence to respective nature conservation requirements is not specifically mentioned by KD Bank (see link, page 3-9). – Policy on activities in protected areas and further areas of particular importance for biodiversity – Activities in protected areas and further areas of particular importance for biodiversity – Disclosure of number of projects within protected areas and further areas of particular importance for biodiversity – Biodiversity management	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector

Facility safety management a Responsibilities and training	exclusion of companies with business segments in the oil and gas sector
4	Companies mitigate the chance of accidents (oil spills, leakages) by making use of the best available techniques and have a solid road map for crisis situations (a so called 'contingency plan').	Yes	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector	

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

5	Companies do not operate in locations where the consequences of an accident for the environment are unmanageable.	Yes	We meet this requirement because we believe companies have a special responsibility to society. This also applies to operations at high-risk sites. We define sites as risky if they are occupied under international humanitarian law or if day-to-day operations or accidents could lead to uncontrollable consequences for the environment and society. In particular, violations and controversies in this area can lead to the exclusion of the company.	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
6	Companies reduce waste from oil and gas extraction and mining, especially the flaring of natural gas, and manage and process this in a responsible way.	Yes	Exclusion criterion: controversial environmental practices – Strategy to reduce use of substance of concern in production processes – Hazardous waste management – Reduction of gas flaring and venting Companies from these industries must meet special standards. We fulfill this requirement as part of our assessment of the ratings of relevant companies as an industry-specific issue. This point is also covered in the area of controversy screening. Relevant standards such as "IFC Environmental Health and Safety Guidelines" are taken into account. Any violation will lead to the exclusion of the company.	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
7	Companies include the environmental and health effects of the dismantling of production facilities, especially of offshore drilling platforms, in plans for the development of new projects.	Yes	– Standards for site closure and reclamation a Multistakeholder approach b Financial provisions c Environmental considerations – Water risk and impact (Activities and impacts in regions with high levels of water stress, Freshwater use inventories, Freshwater use reduction targets and action plans) – Water risk and impact (Activities and impacts in regions with high levels of water stress) – Policy on human rights (Right to water) – Human rights due diligence procedures Companies operating in this industry must meet high requirements. We meet the requirement by using the exclusion criterion "Deep Water Drilling". It is important to us that companies know their impact and, in particular, do not use seismic technologies to explore for oil and natural gas that harm marine life. We address this point as part of our engagement activities. In addition, violations lead to the exclusion of the companies.	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
8	Companies conduct water scarcity impact assessments in water scarce regions.	Yes		Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
9	Companies have comprehensive mitigation measures in place to address community and ecosystem water requirements in areas where environmental impact assessments identify that significant impacts to water resources are likely.	Yes		Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
10	Companies reduce the effects of seismological research on whales and other marine mammals.	Yes		
11	Companies respect the ILO Declaration on Fundamental Principles and Rights at Work.	Yes	see "Labour rights" folder	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
12	Companies prevent conflicts over land rights and acquire natural resources only by engaging in meaningful consultation with local communities and obtaining free, prior and informed consent (FPIC) when it concerns indigenous peoples.	Yes	– Policy on human rights (e.g. resettlement and compensation; indigenous peoples and traditional livelihoods) – Community outreach and consultation Companies may only advertise natural resources if they obtain them with the consent of free, prior and informed indigenous peoples and people with traditional tenure rights. We meet this requirement in the ESG Corporate Rating under the item policy on human rights and check whether companies commit to this principle. Companies that do not meet this point are excluded if our engagement activities do not have an impact. In addition, this point is an important part of the controversy screening.	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
13	Companies prevent conflict over land rights and acquire natural resources only with free, prior and informed consent (FPIC) of peoples with customary tenure rights.	Yes	– Policy on human rights (e.g. resettlement and compensation; indigenous peoples and traditional livelihoods) – Community outreach and consultation	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
14	Companies follow the Voluntary Principles on Security and Human Rights for the protection of their employees and the company sites.	Yes	– Policy on human rights	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

15	Companies have processes to enable the remediation of any adverse human rights impact to which they cause or to which they contribute.	Yes	- Policy on human rights - Community outreach and consultation	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
16	Companies pay the taxes owed in each country where they operate	Yes	- Tax base erosion and profit shifting - a Transfer pricing - b Presence in jurisdictions enabling tax base erosion and profit shifting - i Position on presence in jurisdictions enabling tax base erosion and profit shifting - ii Transparency on presence in jurisdictions enabling tax base erosion and profit shifting: - Public disclosure of payments to government - a Payments by country - b Types of payments - Public disclosure of economic activity - a Employees by country: - b Revenues by country: - c Profits by country: - Public disclosure of financial assistance received from governments - Major controversies relating to financial relations with governments - Major controversies relating to business ethics - Public disclosure of payments to government - a Payments by country - b Types of payments - Public disclosure of economic activity - a Employees by country: - b Revenues by country: - c Profits by country: - Public disclosure of financial assistance received from governments	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
17	For each country in which companies operate, they report country-by-country on their revenues, profit, FTEs, subsidies received from governments and payments to governments (e.g. withholding taxes, payments for concessions and company tax).	Yes	- Public disclosure of payments to government - a Payments by country - b Types of payments - Public disclosure of economic activity - a Employees by country: - b Revenues by country: - c Profits by country: - Public disclosure of financial assistance received from governments	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
18	Offering, promising, giving, or requiring, either directly nor indirectly, bribes or other undue advantages in order to acquire or to maintain assignments or other undue advantages, is unacceptable.	Yes	- new exclusion criterion (revision 2016): corruption; Corporate Governance-Kodex für Genossenschaften, Punkt 4.3.2	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
19	Companies only operate in weak governance zone or conflict-affected areas if they are able to demonstrate that they are not causing or contributing to human rights abuses.	Yes	- Companies operating in conflict areas or industries must meet higher requirements and demonstrate that they do not cause or contribute to human rights abuses. We fulfill this requirement in the ESG Corporate Rating in the area of policy on human rights and check whether companies recognize their commitment to this principle. In addition, this point is covered in the controversy screening. Companies that violate this requirement are excluded. - Policy on human rights - Human rights due diligence procedures i. Human rights risk and impact assessment ii. Human rights trainings iii. Integration of stakeholders in human rights management iv. Monitoring and auditing v. Grievance and remedies - Major controversies relating to human rights	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
20	Extracting oil from tar sands is unacceptable.	Yes	new Exclusion criterion: Extracting oil from tar sands is unacceptable.	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
21	Extracting oil from oil shale is unacceptable.	Yes	Exclusion criterion: total fossil-fuel-related activities (> 30 % of net sales)	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
	Extracting fuel from liquefied coal is unacceptable.	Yes	Exclusion criterion: processor coal >5%	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

22	Extracting shale gas is unacceptable.	Yes	Exclusion criterion: total fossil-fuel-related activities (> 30 % of net sales)	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
23	Arctic drilling for oil and gas is unacceptable.	Yes	Exclusion criterion: total fossil-fuel-related activities (> 30 % of net sales)	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
24	New oil and gas exploration is unacceptable.	Yes	We meet this requirement because by 2030 at the latest, we will no longer invest in any companies that generate significant sales from the extraction or the generation of electricity from fossil fuels. Against this background, we are making a clear commitment against all new oil and gas exploration.	
25	Construction of new oil and gas pipelines is unacceptable.	Yes	We meet this requirement because by 2030 at the latest we will no longer invest in any companies that generate significant sales from the extraction or conversion of fossil fuels into electricity. Against this background, we are making a clear commitment against all new oil and gas pipelines.	
26	Companies publish a sustainability report that may contain (a number of) disclosures from the GRI Standards.	Yes	– Sustainability reporting Der GRI-Standard hat die Entwicklung der Reserach-Methodik stark geprägt. Eine Konformität kann sich positiv in der Bewertung eines Unternehmens widerspiegeln. Andere Reportings können jedoch ebenso berücksichtigt werden.	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
27	Large enterprises and multinational enterprises publish a sustainability report that is set up in accordance with the (Core or Comprehensive option of) GRI Standards.	Yes	– Sustainability reporting (Reporting topics, Reporting quality, Assurance of reporting) Der GRI-Standard hat die Entwicklung der Reserach-Methodik stark geprägt. Eine Konformität kann sich positiv in der Bewertung eines Unternehmens widerspiegeln. Andere Reportings können jedoch ebenso berücksichtigt werden.	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
28	Companies integrate social, economic and environmental criteria in their procurement and operational policies.	Yes	– Environmental supplier standard – Procedures to ensure compliance with the environmental supplier standard – Green procurement of office supplies – Supplier standards with regard to labour rights and working conditions – Procedures to ensure compliance with supplier standards on labour rights and working conditions	Corporate credits and Project finance: exclusion of companies with business segments in the oil and gas sector
29	Companies include clauses on the compliance with environmental, social and governance criteria in their contracts with subcontractors and suppliers.	Yes	Companies that do not include clauses on compliance with environmental, social and governance criteria in their contracts with subcontractors and suppliers are excluded if our engagement activities do not have an impact. We meet this requirement in the rating under the Supplier Code of Conduct item. Depending on the industry, further sub-points must also be fulfilled. In addition, this point is an important part of the controversy screening.	
Power Generation				
Fair finance Guide: The following elements are crucial for a policy regarding the companies a financial institution invests in:		Bestandteil Ratingsprozess	Genaue Definition des Kriteriums in der ISS ESG Ratingsystematik:	Barbar hinaus Ausschluss im Kundenkreditgeschäft (Corporate credits und Project finance)
4	Unabated coal-fired power generation (i.e. without operational carbon capture and storage) is unacceptable.	Yes	Exclusion criterion: coal processors >5%	Corporate credits and Project finance: exclusion of companies with business segments in the power generation sector (without renewable energy generation)
5	Coal fired power generation is unacceptable	Yes	Exclusion criterion: coal processors >5% relevant	Corporate credits and Project finance: exclusion of companies with business segments in the power generation sector (without renewable energy generation)
6	Fossil fuel fired power generation are unacceptable.	Yes	Exclusion criterion: total fossil-fuel-related activities (> 30 % of net sales)	Corporate credits and Project finance: exclusion of companies with business segments in the power generation sector (without renewable energy generation)
7	Nuclear energy is unacceptable.	Yes	Exclusion criterion: nuclear power (producer/nuclear power > 5% of net sales)	Corporate credits and Project finance: exclusion of companies with business segments in the power generation sector (without renewable energy generation)

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

8	Large scale hydropower generation is unacceptable	Yes	Not exactly in this wording/consequence, but thematic coverage (large hydropower is addressed in the ISS ESG Rating it is only deemed unacceptable when not planned and operated according to advanced environmental and human rights / social standards) – Measures to ensure the sustainable operation of hydro power stations – Major environmental controversies, fines or settlements relating to energy generation – Policy on human rights – Human rights due diligence procedures i. Human rights risk and impact assessment ii. Human rights trainings iii. Integration of stakeholders in human rights management iv. Monitoring and auditing v. Grievance and remedies – Major controversies relating to human rights – Protected areas a. Policy on activities in protected areas and further areas of particular importance for biodiversity b. Activities in protected areas and further areas of particular importance for biodiversity c. 17	The production of biomaterials complies with the 12 principles of the Roundtable on Sustainable Biomaterials (RSB).	Yes	Measures to ensure the sustainable production and sourcing of biomass	Corporate credits and Project finance: exclusion of companies with business segments in the power generation sector (without renewable energy generation)
18	Companies publish a sustainability report that may contain (a number of) disclosures from the GRI Standards.	Yes	Sustainability reporting Der GRI-Standard hat die Entwicklung der Research-Methodik stark geprägt. Eine Konformität kann sich positiv in der Bewertung eines Unternehmens widerspiegeln. Andere Reportings können ebenso berücksichtigt werden.	Corporate credits and Project finance: exclusion of companies with business segments in the power generation sector (without renewable energy generation)
19	Large enterprises and multinational enterprises publish a sustainability report that is set up in accordance with the (Core or Comprehensive option of) GRI Standards.	Yes	Sustainability reporting (Reporting topics, Reporting quality, Assurance of reporting) Der GRI-Standard hat die Entwicklung der Research-Methodik stark geprägt. Eine Konformität kann sich positiv in der Bewertung eines Unternehmens widerspiegeln. Andere Reportings können jedoch ebenso berücksichtigt werden.	Corporate credits and Project finance: exclusion of companies with business segments in the power generation sector (without renewable energy generation)
20	Companies integrate social, economic and environmental criteria in their procurement and operational policies.	Yes	- Environmental supplier standard - Procedures to ensure compliance with the environmental supplier standard - Green procurement of office supplies - Supplier standards with regard to labour rights and working conditions - Procedures to ensure compliance with supplier standards on labour rights and working conditions	Corporate credits and Project finance: exclusion of companies with business segments in the power generation sector (without renewable energy generation)
21	Companies include clauses on the compliance with environmental, social and governance criteria in their contracts with subcontractors and suppliers.	Yes	Companies that do not include clauses on compliance with environmental, social and governance criteria in their contracts with subcontractors and suppliers are excluded if our engagement activities do not have an impact. We meet this requirement in the rating under the Supplier Code of Conduct item. Depending on the industry, further sub-points must also be fulfilled. In addition, this point is an important part of the controversy screening.	
Gender equality				
Grundsätzliche Aussagen zum Themenfeld Gender Equality => Die Bank für Kirche und Diakonie hat das Ziel, 30 Prozent der Führungspositionen auf allen Ebenen mit Frauen zu besetzen. Dieses Ziel ist in der Personalstrategie der Bank verankert und der Vorstand der Bank berichtet dem Aufsichtsrat jährlich über den Status und die Maßnahmen der Bank. Als Maßnahmen wurde zum Beispiel definiert, dass bei gleicher Eignung Bewerber des unterrepräsentierten Geschlechts bevorzugt werden sollen und der Anteil der weiblichen Trainees mindestens gleich dem Anteil der männlichen Trainees sein soll (aktueller Status: 60 Prozent).				
Fair Finance Guide: The following elements are crucial for a policy regarding the companies a financial institution invests in:				
8	Companies have made a policy commitment to mitigate the human rights risks faced by people as a result of their gender.	Yes	Genaue Definition des Kriteriums in der ISS ESG Ratingsystematik: - Human rights policies and standards - Policy on non-discrimination - No difference made between men and women	Darüber hinaus Ausschluss im Kundenkreditgeschäft (Corporate credits und Project finance)
10	Companies have a zero-tolerance policy commitment towards gender-based violence in the workplace, including verbal, physical and sexual harassment.	Yes	Policy on non-discrimination	
11	Companies have systems in place to actively manage pay equity.	Yes	- Equal opportunities and non-discrimination - Public disclosure of CEO to employee compensation ratio	
12	Companies have systems in place to prevent and mitigate gender discrimination of its customers.	Yes	The research process covers allegations of companies discriminating against its customers based on gender under the keyword "Discriminatory treatment of consumers" (definition: This category applies to companies criticised for discriminating against consumers on grounds that include age, disability, gender, medical condition, national origin, race, religion or sexual orientation. Not to be confused with workplace discrimination, which falls under labour rights.)	
13	Companies guarantee at least 30% participation and equal access of women and men at Board of Directors, Executive positions, and Senior management level.	Yes	The company has to ensure the proportional representation of women in management positions and gender parity in the executive management team.	

Umsetzung der im Rahmen des Fair Finance Guides erhobenen Kriterien in der ISS ESG Ratingsystematik

14	Companies guarantee at least 40% participation and equal access of women and men at Board of Directors, Executive positions, and Senior management level.	Yes	The company has to ensure the proportional representation of women in management positions and gender parity in the executive management team.	
15	Companies provide targeted professional development, and where necessary also education and training, for employees to promote equal access for women to senior level positions.	Yes	The company has to ensure the proportional representation of women in management positions and gender parity in the executive management team.	
16	Companies include gender and women's rights criteria in their procurement and operational policies.	Yes (operational policies)	- Policy on non-discrimination	
17	Companies include clauses on the compliance with gender and women's rights criteria in their contracts with subcontractors and suppliers.	Yes	The requirement exists in the area of Supplier Code of Conduct. The query in the rating is aimed at further sub-items, e.g. child labor, wages, discrimination, harassment, abusive behavior, gender and women's rights criteria. The supplier standard has to be signed by suppliers. The wording of the standard (or the vast majority of its requirements) is binding. Bindingness consists of two requirements, only in case both are met for all (or the vast majority) of standards a grade is awarded: 1) suppliers have to sign the standard / contractually abide by the standard (e.g. by incorporating standard into contracts) 2) wording of the standard must be binding (e.g. "suppliers shall/are required" / "we expect suppliers to..." instead of "suppliers should/are encouraged") The following indicators are checked: prohibition of forced labour, prohibition of child labour, Reference to ILO, Freedom of Association, Health and Safety, Wages, Working Time, Regular employment, migrant workers, harassment and abusive behaviour, discrimination, inclusion of extended supply chain, gender and women's rights criteria	

Erläuterungen zum Thema Remuneration	
4	The fixed salary does not exceed twenty times the lowest salary or the maximum of the lowest salary scale within the financial institution. Die Bank für Kirche und Diakonie veröffentlicht die Einkommen der Vorstände im Freiwilligen Offenlegungsbericht nach § 16 Instituts-Vergütungsverordnung (https://www.kd-bank.de/wir_fuer_sie/ueber-uns.html). Das Verhältnis zwischen dem höchsten Einkommen und dem niedrigsten Einkommen liegt aktuell deutlich unter 20. Im Rahmen der Nachhaltigkeitsberichterstattung berichtet die KD-Bank über das Verhältnis der Jahresvergütung des höchstbezahlten Mitarbeiters zum mittleren Niveau (Median) der Jahresvergütung aller Beschäftigten (ohne den höchstbezahlten Mitarbeitenden) betrug im Berichtsjahr 2022: 1:6,2.
Erläuterungen zum Thema Transparency and Accountability	
21	The financial institution has complaint mechanisms for clients and non-clients. Die Beschwerdemanagement-Prozesse der Bank für Kirche und Diakonie sind hier beschrieben: https://www.kd-bank.de/wir_fuer_sie/lob-und-kritik.html Über diese Prozesse hinaus besteht für unsere Stakeholder - im weitesten Sinne des Wortes - die Möglichkeit bei vermuteten Verstößen gegen die OECD-Richtlinien Rückgriff auf die Nationalen Kontaktstellen (NKS) der OECD, zu deren Aufgaben auch die Lösung von Problemen, die sich aus der angeblichen Nichteinhaltung der OECD-Richtlinien ergeben, zu koordinieren. Die Bank für Kirche und Diakonie wird sich nach einer rechtlichen Prüfung an die Entscheidungen der NKS halten.
22	The financial institution establishes or participates in effective operational-level grievance mechanisms for individuals and communities which may be adversely impacted by activities that it is connected to.
23	The financial institution reports on the grievance mechanism process, including its progress and performance.
24	The financial institution commits to respecting and cooperating in good faith with State-based non-judicial and judicial grievance mechanisms when cases that it is connected with are brought to such a mechanism.
